NOTES FOR CONTRIBUTORS

1. Archaeometry aims to cover the interaction between the sciences and archaeology, conservation and art history. In addition to standard articles presenting the results of innovative and coherent programmes of research involving either the development of new methods or the application of established methods, the journal will also publish longer review articles as well as short notes, including comments on published articles.

2. Submission of manuscripts. All materials for publication should be sent to one of the three Managing Editors:

   Professor M S Tite, Research Laboratory for Archaeology & the History of Art, University of Oxford, 6 Keble Road, Oxford OX1 3QJ, UK.

   Professor G A Wagner, Max-Planck-Institute fur Kernoophysik, Postfach 103980, 69029 Heidelberg, Germany.

   Professor M S Shackle, Archaeological XRF Laboratory, 103 Krober Hall, University of California, Berkeley, CA 94720-3712, USA.

   THREE COPIES OF THE MANUSCRIPT SHOULD BE SUPPLIED. Manuscript should be in English and typed on one side only of paper, double-spaced with wide margins. Notes and footnotes should be avoided. Standard articles should not normally exceed 9,000 words and review articles not more than 12,000 words, inclusive of illustrations and tables which should be evaluated at 600 words per page. Review articles surveying recent developments in a field are normally commissioned but suggestions in the form of a one-page synopsis are welcomed.

3. Symbols and units. The conventions for abbreviations of units and symbols are those recommended by the British Standards Institution (leaflet B.S. 5775).

4. Abstracts/keywords. Abstracts should be suitable for separate publication and should not exceed 100 words. Keywords (up to a maximum of 10) should cover, as appropriate, geographical region, period, scientific techniques used, object type, material or species and information sought.

5. References. Use the Harvard (author-date) style of referencing, citing in the text author's name, date of publication, and any specific page references, and give the full reference (including full page references of an article) in an alphabetical list of authors at the end of the article.

6. Illustrations. Whether photographs or drawings, should be numbered in one series in their order of mention. Captions should be listed on a separate sheet. Only high-quality photocopies of artwork should be submitted initially. Original line drawings and photographs will be required for printing.

7. Colour illustrations. Illustrations in colour can be accepted for publication if the clarity of the presentation is significantly increased and if the authors defray the cost of publication.

8. Proofs. Proofs will be sent directly to the authors by the publisher, and should be returned immediately after correction.

9. Offprints. 25 offprints of each article will be provided free of charge to the first-named contributor. Additional offprints may be purchased from the publisher according to a scale of charges.

10. Copyright. Authors submitting a manuscript do so on the understanding that a condition of publication is the assignment of copyright to The University of Oxford, including the right to reproduce the article in all forms and media, to be administered by the publishers. The Copyright Assignment Form, which may be downloaded from our web page, should be signed by the author or first-named author and should accompany the original submission of a manuscript to this journal. The transfer of copyright does not take effect until the manuscript is accepted for publication.

   However, it is the policy of the Publisher that authors retain all their moral rights, as defined in the Copyright, Designs and Patents Act 1988:
   (a) paternity (the right to be identified as the author wherever the work is reproduced),
   (b) the right to object to derogatory treatment of their work,
   (c) the right not to have their work falsely attributed.
Furthermore, the Publishers state that authors:
(a) retain the right to re-use their own work subsequently in volumes they author or edit,
(b) will be consulted before Blackwell grant permission for other publishers to reprint their work in anthologies, and are paid 50% of permission fees
(c) may make copies of their papers for use in classroom teaching and research purposes provided that (i) such copies are not resold and (ii) that reference to the original source of publication and the name of the copyright holder is clearly stated on any copies made of the article.

11. Disc version Files should be sent on 3.5" disc for Macintosh or preferably PC, together with double-spaced 'hard' paper copy. Text, References and a list of Figure captions should be included, without any character and paragraph style formatting. The preferred format is Microsoft Word 97 or earlier; otherwise files should be sent in Rich Text Format (RTF). Turn off hyphenation; one font size throughout; do not justify at the right; do not indent paragraphs; do not use bold text in headings.

Headings and subheadings: type these at the left margin (do not centre nor indent), utilizing the following simplified hierarchy:
(a) upper case throughout (no full point at the end), preceded and followed by two hard returns
(b) upper (first letter of first word) and then lower case (no full point at the end) preceded and followed by two hard returns
(c) upper (first letter of first word) and then lower case (no full point at the end), preceded and followed by two spaces, then text.

Separate all paragraphs by two hard returns.

References: separate all references by two hard returns; do not indent turnover lines (the second and subsequent lines of a reference). Tables must be in separate files from the text: the preferred format is Microsoft EXCEL. Figures must be in separate files from the text: the preferred formats are tif or eps.
