KRONOS

Java plug-in Failed to load…

Right mouse click over the yellow bar above the Kronos banner.

Select “Run Add-on”, it may also say “Run Active X”

Click “Run”
You may also receive a “certificate out of date message”. Just accept the new certificate.

You should now see this window.

![KRONOS interface](image)

You can now use KRONOS!

If you do not get the above window, a different error message or a white screen with a red circle and X, please contact the Library Helpdesk.
