

Names: _____

Hypothesis: _____

Supporting Questions:

(questions you need to answer to prove/disprove your hypothesis)

Using research tools from the list of resources, select **three** good sources on your topic. List your sources according to the format described in *The ACS (American Chemical Society) Style Guide* available from the library site <http://www.lib.berkeley.edu/CHEM/chem1a/>. List which supporting question(s) your source helps to answer. In one or two sentences, describe what information the source provides. Determine what organization the authors are from and what purpose the authors had in writing this document. Finally, make note of the tool (resource) you used to find each source.

1. Citation:
Which question does this reference address?
Describe briefly what information you will use from the source.
Where are the authors from? University Company Government Science News Magazine Other (specify)
What do the authors want to accomplish? Convey research results Affect purchasing decisions Dispel myths Affect public opinion Present one side of argument Other (specify)
Tool used to find source:
