

The Role of GSIs in Guiding Undergraduate Research

Together with a partner, draw up a plan to prepare GSIs for the specific responsibilities they will have in guiding undergraduates in the research assignment you have designed. For each area of expertise that GSIs need to develop, you should consider how you will prepare GSIs to teach undergraduates these skills, and who will provide the training (e.g., you as the faculty member teaching the course, GSI Teaching and Resource Center staff, Educational Technology Services, Library).

Skill needed by students . . .	What GSIs need to do . . .	How GSIs will develop these skills . . .	Who will provide training . . .
---------------------------------------	-----------------------------------	---	--

Example:

Critical reading skills

Teach critical reading skills

Workshop in weekly GSI meeting

Faculty member or GSI Teaching & Resource Center
