The *Journal of Anthropological Archaeology* publishes articles on the theory and methodology of archaeology as they relate to the understanding and explanation of the organization, operation, and evolution of human societies. The breadth of relevant subject matter is wide, therefore extending from the earliest forms of "proto-culture" to the most complex empires and industrial nations. The range of relevant topics is similarly broad, encompassing purely theoretical modeling, archaeological and historical analyses, contemporary ethnoarchaeological studies, etc. Additionally, contributions from related disciplines such as physical anthropology, ethnology, sociology, ecology, and evolutionary biology often will be germane to the interests served by the *Journal of Anthropological Archaeology*. It is the common concern with development of theory, and appropriate methodology, relevant to the explanation of human cultural systems and their evolution that brings such diverse and broadly ranging contributions together in this journal.

**Submission of Manuscripts.** Manuscripts must be written in English and should be submitted in triplicate, including three sets of good-quality figures, to

**Professor John M. O’Shea, Editor**

*Museum of Anthropology*

*University Museums Building*

*The University of Michigan*

*Ann Arbor, Michigan 48109-1079*

Failure to submit the required number of copies may delay review.

There are no submission fees or page charges. Each manuscript should be accompanied by a letter outlining the basic findings of the paper and their significance.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission has been approved by all of the authors and by the institution where the work was carried out. It is further understood that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor’s discretion. Articles and any other material published in *Journal of Anthropological Archaeology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor and the Publisher.

Authors submitting a manuscript do so on the understanding that if the manuscript is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Copyright Transfer Agreement, which may be copied from the journal home page listed here, should be signed by the appropriate person and should accompany the original submission of a manuscript to this journal. The transfer of copyright does not take place until the manuscript is accepted for publication.

Authors are responsible for obtaining permissions to reprint previously published figures, tables, and other material. Letters of permission should accompany the final submission.

**Electronic Transmission of Accepted Manuscripts.** Authors are requested to transmit the text and art of the manuscript in electronic form, normally via computer disk, after all
revisions have been incorporated and the manuscript has been accepted for publication. Submission as an e-mail attachment is strongly encouraged provided that all files are included in a single archive the size of which does not exceed 2 megabytes (gsheathumich.edu). Hard-copy printouts of the manuscript and art must also be supplied. The manuscript will be edited according to the style of the journal, and authors must read the proofs carefully. Complete instructions for electronic submission can be found on the journal home page (http://wwwacademicpress.com/jaa).

Digital Object Identifier. Academic Press assigns a unique digital object identifier (DOI) to every article it publishes. The DOI appears on the title page of the article. It is assigned after the article has been accepted for publication and persists throughout the lifetime of the article. Because of its persistence, it can be used to query Academic Press for information on the article during the production process, to find the article on the Internet through various Web sites, including IDEAL, and to cite the article in academic references. When a reference to an online version of an article is being cited and that reference has yet to appear in print, authors may want to include the DOI, as volume and page information is not always available. See References below for samples of DOIs included in references. Further information may be found at http://wwwacademicpress.com/doi.

Preparation of the Manuscript. Manuscripts that are not adequately prepared will be returned to the authors, since it is not feasible for the Editors to revise or rewrite manuscripts. Contributors, particularly those unfamiliar with English usage, are encouraged to seek the help of colleagues in the preparation and review of manuscripts prior to submission. This practice reduces the time required for review and avoids delay in publication. Manuscripts should be double-spaced throughout on one side of 8.5 x 11-inch or A4 white paper. Pages should be numbered consecutively.

The Title Page (p. 1) should contain the article title, authors’ names and complete affiliations, a running title of less than 50 characters, and the address for manuscript correspondence (including e-mail address and telephone and fax numbers).

The Abstract (p. 2) must be a single paragraph that summarizes the main findings of the paper in 50 to 200 words. The abstract should be a concise and informative summary that can be copied verbatim by bibliographers. The title should be suitable for indexing. After the abstract a list of up to 10 key words that will be useful for indexing or searching should be included.

Units. Metric units should be used throughout, with English equivalents in parentheses if originally given in English units. When used in conjunction with numerals, units should be abbreviated and unpunctuated (e.g., cm, g, %). Use the American Chemical Society Style Manual as a guide.

Numbers. Numbers less than 10,000 should be expressed without a comma (e.g., 5455) but those of greater value should have a comma or commas separating each triad of digits (e.g., 15,640; 1,200,000).

Dates. Historical dates should be expressed as years BC or AD (e.g., 1850 AD; 2000 BC). Radiocarbon dates should be expressed in 14C years BP (before present) and should include the standard error as well as the laboratory number (e.g., 14,730 ± 150 years BP (Y-661)). If the dates have been corrected for atmospheric variations in radiocarbon, the calibrated dates should be reported as calendar years (e.g., 500 BC* or 2450 BP*) and the calibration table specified. K/Ar dates should also include the standard error; dates less than 1 million years old should be written out (e.g., 150,000 ± 10,000 years) but dates of a million or more years may be expressed in my (e.g., 2.43 my). If laboratory numbers have been designated, they should be given in parentheses following the date (e.g., 2.43 my (QLK-10)).

Chemical Notation. International notation should be employed in all cases (e.g., 18O, 14C, 3H).

Temperature Notation. Temperatures should be expressed in degrees Celsius (°C), with Fahrenheit equivalents in parentheses if originally reported in such units (e.g., 20°C (68°F)).

References. References should be listed in alphabetical order of author names. When the first author's name is repeated in a subsequent reference, initials should be used. If more than one work by the same author is listed, the works should be separated by a semicolon (;). References to unpublished manuscripts, theses, or personal communications should be given at the end of the list of references. The year should be given in parentheses after personal communication. When a reference is to a work published in a journal, use the name of the journal, the volume number, the page numbers of the first and last pages of the article, and the month and year of publication (e.g., Bottema, Sytze, et al. 1997 Man's Rotterdam. Spaulding, Alben 1977 On growing Anthropology. Hodder, Ian 1979 Simulating the evolution of culture. Academic Press. Jacob, Paul 2001 Hunter- gatherer. doi. 10.1038/35119075. Jochim, Michael 1976 Hunter-gatherer. New York. Figures should be consecutively numbered, with figure number and author's name at the bottom of each figure. Letters and line drawings should be high resolution copies. If the size of a figure exceeds the page, reduction for publication should be made by the author(s) (see instructions for authors). Figures may not exceed the page size. Publication costs are charged for additional pages.

Tables should be numbered consecutively (e.g., Table 1). A table should be inserted at the appropriate point in the text. Type or print tables as camera-ready copy, double-spaced, and do not include any lines or headings. Each table should be placed on a separate page as close to the reference to which it applies. Tables should be titled and given a brief description. If the same table is used more than once, refer to it by its number and give the page number. Footnotes should be typed directly after the table and should be double-spaced. (See example: Table 1.)

Proofs will be sent to authors and should be returned promptly. Changes necessitated by the proof should be kept to a minimum and will be charged for at the publisher's discretion.

Reprints. Fifty reprints of the article will be supplied to the corresponding author, at no charge.

Additional reprint orders should be submitted to Academic Press.
References. References should be cited in the text by author’s surname and date such as “Doe (1990) reported that...” as previously reported (Doe et al. 1990). Suffixes (a, b, etc.) should be used to distinguish two or more works by the same author(s) in the same year; e.g., Doe (1994a, 1994b). Page numbers should be given whenever practical. A direct quotation should always be page-referenced; a paraphrased statement should be page-referenced if the article exceeds 10 pages. The reference section should be arranged alphabetically according to the authors’ surnames. Order of items: author(s), date of publication, title of article, journal or book title (written out in full rather than abbreviated), volume number, inclusive pages, and (for books only) publisher and city. When citing an Academic Press journal, authors may choose to include the DOI, if available, from the article’s title page. Please note the following examples, the fourth of which shows an article available on IDEAL but not yet assigned to a printed issue.

Bottema, Sytze, G. Entjes-Nieborg, and Willem van Zeist (Editors)

1990 Man’s role in the shaping of the eastern Mediterranean landscape. Balkema, Rotterdam.

Spaulding, Albert C.

Hodder, Ian

Jacob, Paul

Jochim, Michael A.

Figures should be in a finished form suitable for publication. Number figures consecutively with Arabic numerals, and indicate the top and the authors on the back of each figure. Lettering on drawings should be professional quality or generated by high-resolution computer graphics and must be large enough to withstand appropriate reduction for publication. Color Figures. Illustrations in color will be accepted only if the author(s) defray the cost. Mounted color figures must be submitted on paper or flexible board due to the nature of the reproduction process.

Tables should be numbered consecutively with Arabic numerals in order of appearance in the text. Type each table double-spaced on a separate page with a short descriptive title typed directly above and with essential footnotes below. Authors should submit complex tables as camera-ready copy.

Proofs will be sent to the corresponding author. To avoid delay in publication, only necessary changes should be made, and proofs should be returned promptly. Authors will be charged for alterations that exceed 10% of the total cost of composition.

Reprints. Fifty reprints will be provided to the corresponding author free of charge. Additional reprints may be ordered.
