Notes for Authors

1. The Journal of Archaeological Science aims to publish papers, reviews, focus articles and short notes covering the interaction between the sciences and archaeology, with particular emphasis upon methodological innovation.

2. Submission of manuscripts. All material for publication should be sent to the Editors: for American and Canadian authors, Professor R. G. Klein, Program in Human Biology, Building 80, Inner Quad; Stanford University, Stanford, CA 94305–2166, U.S.A.; authors from all other countries, Dr. J. P. Glatthaar, Journal of Archaeological Science, c/o Academic Press Editorial Services Office, Block A2, Westbrooke Centre, Milton Road, Cambridge CB4 1YG, UK; Tel. +44 (0)1223 446003; Fax +44 (0)1223 4460236; E-mail: jas@harcourt.com. Books for review should be sent to the Book Reviews Editor. FOUR COPIES OF MANUSCRIPTS SHOULD BE SUPPLIED, ALONG WITH PHOTOCOPIES OF ARTWORK REDUCED TO FIT JOURNAL FORMAT. Please also supply email, fax and telephone numbers. Free possible return of the manuscript; only three copies will be supplied. Substantially revised manuscripts should be resubmitted. The address to which papers should be sent is: S. J. H. MacDonald, 1040 West 10th Avenue, Vancouver, B.C., Canada V6H 2C3. Manuscripts should be typed on one side only of the page, double-spaced with wide margins. Notes and footnotes should be avoided. Preference will be given to papers less than 3000 words in length (including notes). Focus articles should be no more than 10 double-spaced pages, approximately 2500 words, and should aim to clarify contested issues or stimulate further discussion.

3. Symbols. In the use of abbreviations and symbols British Standards 1991 Part 1: 1954 should be followed. SI Units (Système International d’Unités) should be used. If other units have been used in the work reported, SI equivalents should appear in parentheses at strategic points.

4. Abstracts/keywords. A short abstract should be submitted with the paper, together with 3–7 keywords suitable for indexing.

5. Spelling. For the sake of uniformity, the editors reserve the right to modify spelling in order to conform to the Oxford English Dictionary.

6. References.应该 be listed alphabetically at the end of the paper, thus:

Mutaz, R. J. (1986). Human auditory ossicle variation and function. Ph.D. Thesis, University of Colorado. Titles of journals should be given in full. References in the text should be by name and date, thus: ‘It has been shown (Braun, 1985) that...’ or ‘which has been confirmed by Mutaz (1986).’

7. Illustrations. Whether photographs or drawings, should be numbered in one series in their order of mention. Captions should be listed on a separate sheet. Only high-quality photocopies of artwork should be submitted initially. Original line drawings and photographs will be required for printing.

8. Colour illustrations. Illustrations in colour can be accepted for publication in the print and electronic versions of the article if the clarity of the presentation is significantly increased and if the authors defray the cost of publishing colour in print. Colour reproduction of figures in the electronic version of the article only (on IDEAL), with black-and-white reproduction in print, is available at no cost. However, authors must provide usable electronic files for the colour versions of their figures (see the complete instructions for electronic submission, including submission of electronic figures, on the journal home page or at http://www.academicpress.com/issn/journal.ejb.htm) and separate files or hard copies of the black-and-white versions of the figures. Only .tif and .eps files in RGB colour mode will be accepted. If the electronic version of the art is unusable, Academic Press will not post the colour version on IDEAL. Colour proofs will be sent only when the colour illustration appears in both the print and electronic versions. Authors should clearly state in a cover letter sent to the editor at submission or final acceptance which figures they would like reproduced in colour for free in the electronic version of the article only and which figures they would like reproduced in colour in the print and electronic versions at a cost to them.

9. Proofs will be sent directly to the authors by the publisher, and should be returned immediately after correction.

10. Alternative proof reader. In order to avoid as much delay as possible in the return of proofs, it would be appreciated if authors who are likely to be away on field work for more than a few days would provide the name and address of an alternative proof reader. This should be done as soon as the manuscript is accepted for press, giving dates within the following six months when field work is anticipated.

11. Copyright/copyleft prints. Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the publisher. The Copyright Transfer Agreement, which may be copied from the pages following the Information for Authors or found on the journal home page listed here, should be signed by the appropriate person(s) and should accompany the original submission of a manuscript to this journal. The transfer of copyright does not take effect until the manuscript is accepted for publication. Exceptions: it is the policy of the Publisher that authors need not obtain permission in the following cases only: (1) to use their original figures and tables in their future works; (2) to make copies of their papers for use in classroom teaching; and (3) to include their papers as part of their dissertations. The Publisher will not put any limitation on the personal freedom of the author to use material contained in the paper in other works. In consideration for the assignment of copyright, the Publisher will supply 50 offprints of each paper. Further offprints may be ordered at extra cost at the proof stage.

12. Digital Object Identifier (DOI). Academic Press assigns a unique digital object identifier (DOI) to every article it publishes. The DOI appears on the title page of the article. It is assigned after the article has been accepted for publication and persists throughout the lifetime of the article. Due to its persistence, it can be used to query Academic Press for information on the article during the production process, to find the article on the Internet through various Web sites, including IDEAL, and to cite the article in academic references. When using an Academic Press article in a reference section, it is important to include the article's DOI in the reference as volume and page information is not always available for articles published online.
