SP 121	SUMMARY OF OUTREACH ACTIVITIES FOR CALIFORNIA'S SEISMIC HAZARDS MAPPING PROGRAM, 1996-1998 By T.C. Smith and B. McKamey	\$25.00
	<p>From 1996 through 1998, the Department of Conservation's Division of Mines and Geology developed and released 40 maps that identify areas where liquefaction and landslide hazards probably are present. These state Seismic Hazard Zone Maps were distributed to affected cities and counties who must, in turn, require site-specific investigations prior to approving most types of development and issuing permits. This report describes, in considerable detail, the methods that DMG used to disseminate the maps and related information to more than 100 cities and four counties, and to the many consulting engineers, engineering geologists, and real estate professionals that by law will participate in implementing various provisions of California Seismic Hazards Mapping Act. <i>Contents:</i> Executive Summary, Historical Background, Seismic Hazards Mapping Act of 1190, Outreach Activities and Information Aids, In-Depth Survey of Four Local Agencies, Meetings With Local Governments and Lessons Learned, Conclusions and Recommendations, 5 appendices, and 1 plate.</p>
